| Delegation | A client can report under Delegation when it is reporting on behalf of an entity different than itself. |

FOREWORD

Getting started

| | |
|------------------------|---|
| For new clients | <p>Thank you for choosing REGIS-TR to support your FinfraG reporting obligation. The steps for onboarding, with the relevant chapters of this Handbook, are:</p> <ol style="list-style-type: none"> 1. Select a primary means of connectivity: Connectivity options. 2. Select an account type: Client accounts. 3. Open an account and define a Central Coordinator: Account setup services. 4. Create user profiles and login: User access to the FinfraG Dashboard. 5. Get ready to submit reports: Transaction reporting. <p>REGIS-TR will provide you with access credentials for your testing in the UAT. For assistance, please don't hesitate to Contact us.</p> |
|------------------------|---|

FinfraG in brief

| | |
|--|---|
| Disclaimer for FinfraG in brief | <p>The information in this section is included only to provide general background and context. While this information is provided according to REGIS-TR's understanding of the regulation, it should not be considered in isolation or as constituting a complete or definitive view on any specific matter. You should form your own definitive view by consulting your legal, financial and tax advisors. REGIS-TR does not accept any liability as a result or otherwise for any error or omission in this information, nor for any reliance placed upon it.</p> |
| Introduction | <p>The aim of FinfraG is to reduce systemic risk by increasing the transparency of the financial markets. The defined derivative counterparty in a transaction according to Art. 104 FinMIA or a third party, must report the transactions to a trade repository. These reports can be accessed by authorised supervisory and regulatory bodies.</p> |
| The regulation applies to: | <p>Financial and non-financial derivative counterparties.</p> <p>Banks.</p> <p>Securities firms.</p> <p>Insurance and reinsurance companies.</p> <p>Parent companies of a financial or insurance group or financial or insurance conglomerate.</p> <p>Managers of collective assets and fund management companies.</p> <p>Collective investment schemes.</p> |

| | |
|---|---|
| | <p>Occupational pension schemes and investment foundations.</p> <p>Companies.</p> <p>Branches.</p> <p>Central counterparties.</p> |
| Reporting obligations and responsibilities | <p>1. Derivatives transactions must be reported to a trade repository authorised or recognised by FINMA.</p> <p>2. The following shall be obliged to report:</p> <ol style="list-style-type: none"> a. in the case of transactions between a financial and a non-financial counterparty: the financial counterparty. b. in the case of transactions between two financial counterparties: <ol style="list-style-type: none"> 1. the financial counterparty which is not small, 2. the selling counterparty in the case of a transaction between two financial counterparties or between two small financial counterparties. c. the counterparty which has its registered office in Switzerland if the foreign counterparty does not report. <p>3. In the event of a transaction between non-financial counterparties, paragraph 2 letters b and c applies by analogy. A transaction between small non-financial counterparties does not have to be reported.</p> <p>4. If the transaction is cleared centrally, the report is submitted by the central counterparty. If a recognised foreign central counterparty does not submit reports, the reporting duty shall remain with the counterparties.</p> <p>5. Third parties may be involved in reporting.</p> <p>Derivative reports must be submitted by close of business on the day following the conclusion, modification or termination of the contract (T+1).</p> <p>Both counterparties must retain their records of the transaction for a minimum of ten years. The retention period begins on expiry of the financial year.</p> |
| Derivative types to be reported | <p>Derivatives are deemed to comprise financial contracts whose price is derived specifically from:</p> <ol style="list-style-type: none"> a. assets such as shares, bonds, commodities and precious metals. b. reference values such as currencies, interest rates and indices. |
| Not deemed to be derivatives | <p>The following are not deemed to be derivatives:</p> <ol style="list-style-type: none"> a. spot transactions. b. derivatives transactions relating to electricity and gas which: <ol style="list-style-type: none"> 1. are traded on an organised trading facility, 2. must be physically delivered, and 3. cannot be settled in cash at a party's discretion. |

| | |
|------------------------------------|--|
| | <ul style="list-style-type: none"> c. derivatives transactions relating to climatic variables, freight rates, inflation rates or other official economic statistics that are settled in cash only in the event of a default or other termination event. d. structured products such as capital-protected products, capped return products and certificates. e. securities lending and borrowing. f. derivatives transactions relating to goods that: <ul style="list-style-type: none"> 1. must be physically delivered, 2. cannot be settled in cash at a party's discretion, and 3. are not traded on a trading venue or an organised trading facility. g. derivatives issued in the form of a security or uncertificated security. h. derivatives accepted in the form of a deposit. |
| <p>Data requirements</p> | <p>Contractual Data must follow these data standards:</p> <ol style="list-style-type: none"> 1. Derivative reports must be submitted in REGIS-TR's proprietary CSV or XML formats. 2. Derivative reports must contain the data fields defined by FINMA. 3. Derivatives data (trades and positions) must be identified by a Unique Trade ID. 4. The reporting counterparty must be identified by a Legal Entity Identifier (LEI). 5. The non-reporting counterparty must be identified by a Legal Entity Identifier (LEI), Business Identifier Code (BIC) or Internal code (COD). 6. Securities must be identified according to the product taxonomy permitted values. 7. The relevant ISO standards must be used to identify several data elements including: <ul style="list-style-type: none"> • Currency • Country • Date and time • LEI • BIC • ISIN • CFI • UPI |
| <p>Reporting start date</p> | <p>01 October 2017</p> <p>Note: The start of the reporting duty by NFC- counterparties was moved by the Federal Council to 1 January 2028.</p> |

ABOUT REGIS-TR

| | |
|----------------------------------|--|
| Introduction | <p>REGIS-TR is a European trade repository for the reporting of trades and transactions across multiple product classes and jurisdictions.</p> <p>We offer a consolidated service that simplifies regulatory reporting obligations by delivering the full range of major European trade repository services through a single agency.</p> <p>We are authorised to provide trade repository services by the:</p> <ul style="list-style-type: none"> • European Markets and Securities Authority (ESMA) and • Swiss Financial Market Supervisory Authority (FINMA). |
| Trade Repository services | <p>Along with our sister company, REGIS-TR UK LTD in London, we are one of Europe's largest trade repository groups, with around 1,500 client accounts and a weekly average of 30 million+ new trade reports, and offering the following reporting services:</p> <ol style="list-style-type: none"> 1. OTC and exchange-traded derivatives (EMIR, UK EMIR, FinfraG) 2. Securities financing transactions (SFTR). |
| Regulatory registrations | <p>REGIS-TR was registered as a trade repository on 14 November 2013 by the European Securities and Markets Authority (ESMA) under Regulation (EU) 648/2012 of 4 July 2012 (EMIR).</p> <p>On 1 April 2017, REGIS-TR was the first trade repository to be recognised by the Swiss regulator FINMA as a foreign TR for reporting under FinfraG (<i>Finanzmarktinfrastukturgesetz</i>).</p> <p>ESMA registered REGIS-TR as a trade repository under Regulation (EU) 2015/2365 (SFTR) on 7 May 2020.</p> |

INTRODUCTION TO FINFRAG SERVICES

| | |
|--------------------------------|---|
| Derivative classes | <p>REGIS-TR accepts derivative reports for all classes under the regulation, as below:</p> <ul style="list-style-type: none"> • Commodity / Energy • Credit • Currency • Equity security • Interest Rate • All other derivative classes not included above |
| Contract types | <p>We accept all derivative contract types, as below:</p> <ul style="list-style-type: none"> • Contracts for Difference (CFDs) • Forward rate agreements • Futures • Forwards • Options • Swaps • Spreadbets • Exotic products |
| Report types | <p>We accept all derivative report types/lifecycle events, as below:</p> <ul style="list-style-type: none"> • N = Transaction is being reported for the first time. • X = Transaction is being reported for the first time and the transfer of the transaction to a position is envisaged on the same day. • M = Modification of erroneous data, supplementation of missing data or updating of positions. • E = Report was made erroneously and should be deleted. • C = Premature termination/cancellation of a contract. • Z = Compression of an OTC derivatives transaction. • V = Reporting of a valuation. • D = Modification of the «Trade ID», provided this had not yet been determined at the time of reporting. • L = Modifications that arise as a result of certain events during the term of the contract and for which no other value applies (lifecycle events). |
| Direct and delegated reporting | <ol style="list-style-type: none"> 1. Direct reporting: The counterparty has the reporting duty and report its side of the transaction. 2. Delegated reporting: The counterparty that delegates the reporting of its side of the transaction to: |

| | <ul style="list-style-type: none"> • a third party that belongs to the counterparty's family group, • a third party that does not belong to the counterparty's family group, or • a reporting party that it is also counterparty of the transaction. <p>Further information: see Delegation.</p> | | | | | | | | | | |
|----------------------------|---|--------------|-------------|----------------------------|---|---------------------------|--|---------------------------|---|---------------------------|--|
| Interoperability | We have set up a series of partnerships with third party providers offering end-to-end reporting solutions, data enrichment, and other services designed to ease the reporting workload for FinfraG. For full details, please see our website . | | | | | | | | | | |
| Account types | <p>1. All REGIS-TR clients with an FinfraG reporting obligation may open an account, regardless of whether they report directly or delegate to another party.</p> <p>2. Clients request account setup services from REGIS-TR.</p> <p>3. The account type required by the client depends on its reporting model. This is a brief summary:</p> <table border="1"> <thead> <tr> <th>Account type</th> <th>Description</th> </tr> </thead> <tbody> <tr> <td>Reporting Participant (RF)</td> <td> <ul style="list-style-type: none"> • This account is for clients that submit derivative reports to which they are the reporting counterparty or other counterparty of the transaction. </td> </tr> <tr> <td>Non-Reporting Entity (NF)</td> <td> <ul style="list-style-type: none"> • This account is for clients that delegate their reporting to a third party. • The account provides read-only access to the derivative reports submitted on the client's behalf. </td> </tr> <tr> <td>Third Party Internal (TF)</td> <td> <ul style="list-style-type: none"> • This account is used by a client to submit derivative reports on behalf of entities in its family group. • The Third Party is not the reporting counterparty or other counterparty of the reported transactions. </td> </tr> <tr> <td>Third Party External (EF)</td> <td> <ul style="list-style-type: none"> • This account is used by a client to report transactions on behalf of entities outside its family group. • The Third Party is not the reporting counterparty or other counterparty of the reported transactions. </td> </tr> </tbody> </table> <p>Further information: see Client Accounts.</p> | Account type | Description | Reporting Participant (RF) | <ul style="list-style-type: none"> • This account is for clients that submit derivative reports to which they are the reporting counterparty or other counterparty of the transaction. | Non-Reporting Entity (NF) | <ul style="list-style-type: none"> • This account is for clients that delegate their reporting to a third party. • The account provides read-only access to the derivative reports submitted on the client's behalf. | Third Party Internal (TF) | <ul style="list-style-type: none"> • This account is used by a client to submit derivative reports on behalf of entities in its family group. • The Third Party is not the reporting counterparty or other counterparty of the reported transactions. | Third Party External (EF) | <ul style="list-style-type: none"> • This account is used by a client to report transactions on behalf of entities outside its family group. • The Third Party is not the reporting counterparty or other counterparty of the reported transactions. |
| Account type | Description | | | | | | | | | | |
| Reporting Participant (RF) | <ul style="list-style-type: none"> • This account is for clients that submit derivative reports to which they are the reporting counterparty or other counterparty of the transaction. | | | | | | | | | | |
| Non-Reporting Entity (NF) | <ul style="list-style-type: none"> • This account is for clients that delegate their reporting to a third party. • The account provides read-only access to the derivative reports submitted on the client's behalf. | | | | | | | | | | |
| Third Party Internal (TF) | <ul style="list-style-type: none"> • This account is used by a client to submit derivative reports on behalf of entities in its family group. • The Third Party is not the reporting counterparty or other counterparty of the reported transactions. | | | | | | | | | | |
| Third Party External (EF) | <ul style="list-style-type: none"> • This account is used by a client to report transactions on behalf of entities outside its family group. • The Third Party is not the reporting counterparty or other counterparty of the reported transactions. | | | | | | | | | | |
| Validation | <p>1. REGIS-TR performs the following validations:</p> <ul style="list-style-type: none"> • Sender authentication • File size • System availability (see below) | | | | | | | | | | |

| | |
|-----------------------------|--|
| | <ul style="list-style-type: none"> • File name convention • Schema validation or CSV format validation • Permission validation • Logical validation • Business validation (correctness and completeness of data). <p>2. To enable clients to track the progress of their submissions, we return an initial acknowledgement of receipt for files uploaded using the FinfraG Dashboard (Pop up indicating that the file has been uploaded successfully). For all upload methods, there is a validation status report (response file) covering each submitted derivative report. If any derivative report is rejected, the validation status feedback report provides the reason for the rejection.</p> <p>3. Validation status reports (response files) are provided to the Report Submitting Entity via the communication channel used to submit the derivative reports.</p> <p>Further information: see Validation.</p> |
| <p>Reporting to clients</p> | <ul style="list-style-type: none"> • We provide a series of reports detailing reporting activity and transaction states. In addition, we provide reports on invoiced fees. • Several connectivity options are available. <p>Further information: see Connectivity options and Reporting to clients.</p> |
| <p>FinfraG Dashboard</p> | <p>This is a secure web user interface designed to simplify the management of client derivative reporting. It enables clients to upload and track derivative submissions, view, query and export reports and access support manuals and other documentation.</p> |
| <p>Connectivity options</p> | <p>REGIS-TR provides one manual and two automated options for:</p> <ul style="list-style-type: none"> • The submission of derivatives and updates, and • The reception of status messages, reports and other communications from REGIS-TR. <p>Manual upload/download</p> <ul style="list-style-type: none"> • Clients needing to report only a small number of derivatives may find it more efficient to submit reports via secure internet access in their FinfraG Dashboard. Note: This method can also be used as a contingency measure. • Clients have access to all reports and communications from REGIS-TR via their FinfraG Dashboard, regardless of the method chosen for the upload of derivatives. <p>Automated file transfer via:</p> <ul style="list-style-type: none"> • SOAP Web Service, or • Secure File Transfer Protocol (SFTP) <p>Further information: see Connectivity options.</p> |

| <p>Production and testing environments</p> | <p>REGIS-TR offers two separate environments for entities reporting under FinfraG. Production account holders have automatic access to both environments. To request access, please contact our Account Setup Team.</p> <p>Production environment: https://web.finfragregis-tr.com/</p> <ul style="list-style-type: none"> • Upload of derivatives • Real-time processing of derivatives • Production: live reporting environment. <p>UAT environment: https://uatweb.finfragregis-tr.com</p> <ul style="list-style-type: none"> • Test environment used by clients to test the changes on the system in the period before these are implemented in the Production environment. • Available free of charge to prospective clients wishing to test REGIS-TR solutions without commitment. | | | | | | | | | | | | | | |

| <p>Client Services</p> | <ul style="list-style-type: none"> • Our Client Services support team provides technical support to all users. • Please note that the team is not simply a generic helpdesk but an expert service offering in-depth knowledge of the regulatory reporting environment and the management of technical solutions. <p>Languages spoken: English, Spanish.</p> <p>Response time: Maximum one working day/Average response time 3 hours.</p> <p>Availability: All REGIS-TR working days.</p> <p>Hours: 08:00 - 18:30 CET</p> <p>Contact details: see Contacts.</p> | | | | | | | | | | | | | | |
| <p>Relationship Management team</p> | <p>REGIS-TR has a team of Relationship Managers in various European locations. Each of these holds regular User Groups to provide news, present product developments and enhancements and discuss industry developments.</p> | | | | | | | | | | | | | | |

| | |
|----------------------------|---|
| | <p>The team can be contacted directly for advice and support on all areas of our business, including on-boarding procedures, testing, fees and documentation.</p> <p>Languages spoken: English, French, German, Italian, Spanish, Czech, Slovak, Croatian, Bosnian.</p> <p>Availability: All REGIS-TR working days.</p> <p>Hours: 08:30 - 18:30 CET</p> <p>Contact details: see Contacts.</p> |
| Infrastructure | <ul style="list-style-type: none"> • REGIS-TR offers a robust, high-capacity technical infrastructure with a range of secure connectivity methods and message formats to enable clients to streamline their reporting. • Our platform uses distributed processing and is optimised for the continuous throughput of a substantial amount of data during each reporting session. • Our multi-channel reporting framework supports parallel real-time processing through each reporting channel. |
| Service Levels/SLAs | <ul style="list-style-type: none"> • These are defined in our General Terms and Conditions, and cover areas such as response times for technical support, availability and content of reports and feedback to clients. • Clients with specific service level requirements are invited to contact their Relationship Manager. |
| Fees and pricing structure | <ul style="list-style-type: none"> • REGIS-TR operates an open and transparent pricing policy in accordance with FRAND pricing principles. We aim to be fair, reasonable and non-discriminatory, adhering to the regulatory requirements governing the pricing of trade repository services. • We provide our clients with a clear, straightforward fee schedule containing all the information required to estimate actual monthly costs. Our fees are cost-related and reflect the clients' actual system usage. We regularly review our pricing structure to ensure our fees remain competitive and cost-effective. • Our fee schedule is available on our webpage under the section 'Key Documents'. |

CLIENT ACCOUNTS

| | |
|--------------------------|---|
| This section applies to: | Entities that report their derivatives to REGIS-TR, whether they report directly, delegate their reporting to another entity or report on behalf of other entities. |
| This section covers: | <ol style="list-style-type: none"> 1. Introduction 2. Reporting Participant account 3. Non-Reporting Entity account 4. Third Party Internal account 5. Third Party External account. |

Introduction

| | |
|----------------------------------|---|
| Purpose of accounts | <p>REGIS-TR accounts are for the use of:</p> <ul style="list-style-type: none"> • Entities that submit derivative reports on their own behalf. • Entities that submit derivative reports on behalf of another entity. |
| Accounts for delegating entities | <p>An entity that intends to delegate its reporting to another entity is not required to hold an account.</p> <p>Note: Delegating entities may prefer to open an account for access to the derivatives submitted on their behalf and to view the associated REGIS-TR reports.</p> |
| Environments | <ol style="list-style-type: none"> 1. REGIS-TR provides two online environments: <ol style="list-style-type: none"> a. Production: live reporting b. UAT: testing of new features and functionalities. 2. REGIS-TR clients with an account in the Production environment will automatically be set-up with an account in the UAT environment. 3. An account in the UAT environment also can be opened to entities before having an account in the Production environment. |
| Direct and delegated reporting | <ul style="list-style-type: none"> • Direct reporting: The counterparty has the reporting duty and report its side of the transaction. <p>Direct reporting is covered by the following conditions:</p> <ul style="list-style-type: none"> • Large financial counterparties (FC+) report on behalf of small financial counterparties, large non-financial counterparties (NFC+) and small non-financial counterparties (NFC-) • Small financial counterparties (FC-) report on behalf of large non-financial counterparties (NFC+) and small non-financial counterparties (NFC-) |

| | |
|-----------------------------|---|
| | <ul style="list-style-type: none"> • Large non-financial counterparties (NFC+) report on behalf of small non-financial counterparties (NFC-) • The selling counterparty is obliged to report in the case of a transaction between two financial counterparties or between two small financial counterparties • The counterparty which has its registered office in Switzerland is obliged to report if the foreign counterparty does not report • Transactions cleared through a central counterparty (CCP) are reported by the CCP. • The Financial Market Infrastructure Ordinance, FinMIO, defines the applied thresholds (Art. 88 FinMIO), as well as the calculation of the average gross position of outstanding OTC derivatives transactions (Art. 89 FinMIO). • Delegated reporting: One counterparty with reporting duty delegates the reporting of its side of the transaction: <ul style="list-style-type: none"> • To a third party that belongs to the counterparty's family group, • To a third party that does not belong to the counterparty's family group, or • A reporting party that it is also counterparty of the transaction. <p>Notes:</p> <p>The reporting obligation of small non-financial counterparties (NFC-) to a trade repository was originally planned to come into force during 2024. The start of the reporting duty by NFC- counterparties was moved by the Federal Council to 1 January 2028.</p> <p>A transaction between small non-financial counterparties does not have to be reported.</p> |
| <p>Account codes</p> | <ol style="list-style-type: none"> 1. Account codes are allocated by REGIS-TR. 2. The account code structure is: two letters denoting account type + four alphanumeric characters. Example: RF6001. 3. The account types are: RF: Reporting Participant TF: Third Party Internal EF: Third Party External NF: Non-Reporting Entity <p>Note: For each account type, the client's account code may be the same regardless of the environment.</p> |
| <p>Account restrictions</p> | <ol style="list-style-type: none"> 1. The same LEI may not hold both a Non-Reporting Entity account and a Reporting Participant account or Third Party account. |

| | |
|---|---|
| | <p>2. The same LEI may not hold two accounts of the same type.</p> |
| Account application, setup and management | <p>1. REGIS-TR clients are required to submit the onboarding forms for initial account setup.</p> <p>2. Account setup will be performed by the REGIS-TR Account Set-up Team according to the documentation received.</p> |
| Reporting to the client | <p>1. REGIS-TR sends the client’s derivative activity and other reports to the accounts of:</p> <ul style="list-style-type: none"> • The Report-Submitting Entity • The Reporting Counterparty <p>Further information: See Definitions.</p> <p>2. All reports to the client are sent via the client’s chosen connectivity channel. The same reports are also available on the client’s secure FinfraG Dashboard.</p> <p>3. While the Report-Submitting Entity will always have an account, a Reporting Counterparty may not. Reports can be sent to account holders only.</p> <p>Further information: See Reporting to Clients.</p> |
| Central Coordinator | <p>All clients with an account need to define and authorise a Central Coordinator when submitting the onboarding documentation. This person:</p> <ul style="list-style-type: none"> • Acts as main point of contact for communications with REGIS-TR, and • Will request the setup and management of client accounts, user profiles and REGIS-TR’s reports to the client. This can be done either by submitting the relevant form or by use of the Contact section in the FinfraG Dashboard. For the latter option, see Contacts. |

Reporting Participant account (RF)

| | |
|----------------------|--|
| This account is for: | <p>A Reporting Counterparty that:</p> <ul style="list-style-type: none"> • Reports its own side of a transaction. • Report its counterparty side of a transaction when the reporting party is also counterparty, and/or • Delegates its reports to a Third Party. <p>Note: Clients that delegate all their reporting may prefer to open a Non-Reporting Entity (NF) account. This provides read-only access to derivatives submitted to REGIS-TR and reports received from REGIS-TR.</p> |
| Account permissions | <p>1. Report</p> <ul style="list-style-type: none"> • Own leg of the derivative, including lifecycle events, • Counterparty leg when the LEI of the RF is also counterparty. |

| | |
|--|--|
| | <p>2. View</p> <ul style="list-style-type: none"> • Derivative records submitted by the account holder on its own behalf • Derivative records submitted by a third party entity on behalf of the account holder. • Derivative submitted by the account holder on behalf of the delegating entity. Condition: the reporting counterparty does not have a REGIS-TR reporting account (RF). If it has a REGIS-TR reporting account, only the response file will be received by the reporting entity. • Reports from REGIS-TR on derivative records submitted by the account holder. Same condition than in the previous point applies for delegated reporting. • Reports from REGIS-TR on derivative records submitted by a third party entity on behalf of the account holder. |
|--|--|

Non-Reporting Entity account (NF)

| | |
|-----------------------------|---|
| This account is for: | <p>A Reporting Counterparty that:</p> <ul style="list-style-type: none"> • Delegates in full its report submissions under FinfraG, and • Requires oversight of the transactions reported on its behalf. |
| Account permissions | <p>This account provides read access to:</p> <ul style="list-style-type: none"> • End of day / Weekly reports of derivative records to which the account holder is a Reporting Counterparty • And other communications from REGIS-TR. |

Third Party Internal account (TF)

| | |
|-----------------------------|--|
| This account is for: | <p>An entity that is not counterparty of the transactions (reporting counterparty or other counterparty) but is a member of the Family Group of the counterparty, and:</p> <ul style="list-style-type: none"> • Has been delegated to report derivatives on behalf of Reporting Counterparties. |
|-----------------------------|--|

| | |
|---------------------|--|
| Account permissions | <ol style="list-style-type: none"> 1. Report <ul style="list-style-type: none"> • The delegating entity's side of the derivative record, including lifecycle events 2. View <ul style="list-style-type: none"> • Derivative submitted by the account holder on behalf of the delegating entity. Condition: the reporting counterparty does not have a REGIS-TR reporting account (RF). If it has a REGIS-TR reporting account, only the response file will be received by the reporting entity. • Reports from REGIS-TR on derivatives submitted by the account holder. Same condition than in the previous point is applied. |
|---------------------|--|

Third Party External account (EF)

| | |
|----------------------|--|
| This account is for: | An entity that is not a counterparty of the transactions (reporting counterparty or other counterparty) and neither a member of the Family Group of the derivative counterparty. |
| Account permissions | See the Account permissions of the Third Party Internal account above. |

DELEGATION

Explanation

| | |
|--------------------------|---|
| This section applies to: | <ol style="list-style-type: none"> 1. Entities that delegate their reporting 2. Third parties delegated to report on behalf of another entity 3. Reporting entities with a RF account that report on behalf of other entities when they are also counterparty of the transactions. |
| Explanation: | <p>The FinfraG regulation defines single-sided reporting and specifies which counterparty has the reporting obligation. Consequently, only one of the counterparties to the trade will report to a TR, while the other counterparty will be identified in the reports as the non-reporting counterparty of that trade.</p> <p>However, the counterparty with the duty of reporting voluntarily can delegate the reporting on a third party or reporting party when it is counterparty of the transaction. This is called</p> |

| | |
|-----------------------------|---|
| | <p>'Voluntary delegation' and under Finfrag covers all cases that involve third party delegation and counterparty delegation.</p> <p>The delegation is notified to REGIS-TR with the proprietary field 'delegation indicator' submitted in the transaction by the delegated entity.</p> |
| <p>Consequences:</p> | <p>When an account (EF/TF/RF) reports on behalf of a Reporting Participant account (RF), the transactions will be allocated in this RF account. This will imply that the RF account will be the only account which will have visibility on the transactions. The account who reports the transaction only will receive the response file.</p> <p>When an account (EF/TF/RF) reports on behalf of a Non-Reporting Participant account (NF), the transactions will be allocated in the EF/TF/RF account. This will imply that the EF/TF/RF account will have visibility on the transactions. The NF account will have visibility on the transactions within their End of Day reports.</p> <p>When an account (EF/TF/RF) reports on behalf of a non-member, the trades will be allocated in the EF/TF/RF account. This will imply that the EF/TF/RF account will have visibility on the transactions.</p> <p>Please note that an RF account can only report on behalf of another entity different than itself when the LEI of the RF account is counterparty of the transaction.</p> |

TRANSACTION REPORTING

| | |
|-----------------------------|--|
| <p>This section covers:</p> | <ol style="list-style-type: none"> 1. Report types and Message types 2. Collateral and valuation 3. File structure and submission |
|-----------------------------|--|

Report types and Message types

| | |
|----------------------------|---|
| <p>Introduction</p> | <p>This section sets out the Report types and message types, the typical purposes of the derivative reports.</p> <p>Notes:</p> <ul style="list-style-type: none"> • The reporting of derivative contracts under FinfraG shall follow FINMA's validation rules and REGIS-TR's reporting formats. |
|----------------------------|---|

- XML schema definitions and CSV templates are available in the Documentation section of the FinfraG Dashboard in the Production and UAT environments.
- REGIS-TR has two distinct collections of protocols, XML schemas and a CSV template.

| Life cycle event | Report type | XML message type | Description of use |
|-------------------|-------------|------------------|--|
| Reported Trade | N | XT | Transaction is being reported for the first time |
| Reported Trade | X | XT | Transaction is being reported for the first time and the transfer of the transaction to a position is envisaged on the same day. Note: This report type is primarily envisaged for exchange-traded derivatives (ETDs) and contracts for difference (CFDs). |
| Modification | M | MX | Modification of erroneous data, supplementation of missing data or updating of positions |
| Modification | D | MX | Modification of the «Trade ID», provided this had not yet been determined at the time of reporting. |
| Modification | L | MX | Modifications that arise as a result of certain events during the term of the contract and for which no other value applies (lifecycle events) |
| Trade Termination | C | TT | Premature termination/cancellation of a contract Note: For modification reports, «Report type» = «M» should be used. |
| Trade Termination | E | TT | Report was made erroneously and should be cancelled. For example, the double reporting of the same transactions with a different «trade ID». |
| Trade Termination | Z | TT | Compression of an OTC derivatives transaction |
| Valuation update | V | VU | Reporting of a valuation |
| Portability | -- | PX | Transfer of derivative records between REGIS-TR accounts. |

Collateral and valuation

| | |
|---------|--|
| Purpose | <p>Valuation updates and certain aspects of collateral are required to be reported in FinfraG.</p> <ul style="list-style-type: none"> • Collateralisation gives an indication as to whether collateralisation has taken place |
|---------|--|

| | |
|--|--|
| | <ul style="list-style-type: none"> • Ongoing report of valuations in accordance with Article 109 FinMIA are to be reported. • Valuation information provides a mark-to-market (or to model) valuation of the counterparty exposure. • Updates of valuation need to be submitted in a chronological order. |
| Applicability | <p>Who: Counterparty obliged to report under FinfraG</p> <p>Deadline: End of the day following valuation date</p> <p>Frequency: Daily; intraday or end of day</p> <p>What: All valuation updates.</p> |
| Collateral data fields and message types | Collateral data fields, "Collateralisation" and "Types of collateralisation" can be reported in message types XT, MX and VU. |
| Valuation data fields and message types | The initial valuation is reported in the fields from 53 Market Value of Contract through to 57 Type of Valuation of the message type XT. Subsequent updates and amendments are made using the message types VU. |
| Usage, formatting and validation | Please refer to FINMA's validation rules and REGIS-TR's inbound formats available in the FinfraG Dashboard in our Production and UAT environments for definitions on usage and formatting. |

MD message

| | |
|---------------|---|
| Report type D | A MX message with 'Report Type D' is used to modify a 'Trade ID' which has not been determined yet at the time of the reporting. |
| Flow | <p>For MX message with 'Report Type D':</p> <ul style="list-style-type: none"> • Field 'Trade ID': previous 'Trade ID' reported should be indicated. • Field 'Interim Trade ID': new 'Trade ID' should be reported. • The content of the field 'Interim Trade ID' will overwrite the content of the field 'Trade ID' in the last status of the contract. |

| Example | Messages | | | | Trade Status | |
|---------|------------|-------------|------------------|----------|------------------|------|
| | TRADE-TYPE | ACTION TYPE | Interim Trade ID | Trade ID | Interim Trade ID | UTI |
| | XT | N | | 1234 | | 1234 |
| | MX | D | 5678 | 1234 | | 5678 |
| | VU | V | | 5678 | | 5678 |

Position Reporting Flow

| Introduction | Participants may choose to report position report in addition to trade report for transactions like exchange-traded derivatives (ETDs) and contracts for difference (CFDs). | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
|---------------------|---|---------|-----------|-------------|-----------|-------------|-------|--------|---------------|---|-----|-----|---|---|---|---------------|---|-----|-----|---|---|---|--------------|---|-----|-----|---|---|---|---------------|-----|-----|-----|---|---|---|--------------|-----|-----|-----|---|---|---|
| Flow | <ul style="list-style-type: none"> • New transaction with Level 'T' and Report Type 'X': Transaction is being reported for the first time and the transfer of the transaction to a position is envisaged on the same day. • New Position should be reported with Report Type 'N' and Level 'P'. • Subsequent lifecycle events such as for example valuation updates and modifications will need to be reported at Position level. | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Example | <table border="1"> <thead> <tr> <th>Concept</th> <th>Date</th> <th>UTI</th> <th>Direction</th> <th>Report Type</th> <th>Level</th> <th>Amount</th> </tr> </thead> <tbody> <tr> <td>Transaction 1</td> <td>T</td> <td>111</td> <td>Buy</td> <td>X</td> <td>T</td> <td>2</td> </tr> <tr> <td>Transaction 2</td> <td>T</td> <td>112</td> <td>Buy</td> <td>X</td> <td>T</td> <td>2</td> </tr> <tr> <td>EoD Position</td> <td>T</td> <td>222</td> <td>Buy</td> <td>N</td> <td>P</td> <td>4</td> </tr> <tr> <td>Transaction 3</td> <td>T+1</td> <td>113</td> <td>Buy</td> <td>X</td> <td>T</td> <td>2</td> </tr> <tr> <td>EoD Position</td> <td>T+1</td> <td>222</td> <td>Buy</td> <td>M</td> <td>P</td> <td>6</td> </tr> </tbody> </table> | Concept | Date | UTI | Direction | Report Type | Level | Amount | Transaction 1 | T | 111 | Buy | X | T | 2 | Transaction 2 | T | 112 | Buy | X | T | 2 | EoD Position | T | 222 | Buy | N | P | 4 | Transaction 3 | T+1 | 113 | Buy | X | T | 2 | EoD Position | T+1 | 222 | Buy | M | P | 6 |
| Concept | Date | UTI | Direction | Report Type | Level | Amount | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Transaction 1 | T | 111 | Buy | X | T | 2 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Transaction 2 | T | 112 | Buy | X | T | 2 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| EoD Position | T | 222 | Buy | N | P | 4 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| Transaction 3 | T+1 | 113 | Buy | X | T | 2 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |
| EoD Position | T+1 | 222 | Buy | M | P | 6 | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | | |

Field erasing protocol

| | |
|---------------------|--|
| Introduction | Clients may submit modifications and corrections to the previously reported and registered derivative contract data. Optional and conditional fields that shall remain unchanged can therefore be blank/missing in a modification/correction. The field erasing protocol is used when it is necessary to amend a previously populated field to become blank. |
| Purpose | <p>To erase (delete, blank out) previously reported data, clients submit a MX message with the field to be erased as follows:</p> <ul style="list-style-type: none"> • For a field in a CSV file, specify NULL • For a tag in an XML file, use the parameter xsi:nil="true" <p>Example: <compression xsi:nil="true" /></p> |

| | |
|-----------------|--|
| | <p>Note: It is necessary to include in the header a declaration like the following:</p> <pre><reportingOperations xmlns="http://finfragregis-tr.com/FinFraG_IN_XML_Schema.xsd" xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance" ></pre> |
| Erasable fields | Optional and conditional fields can be erased. The erasing of one or more fields only can be applied according to the validation rules explained in the REGIS-TR Inbound Format File. |

File structure and submission

| | | | | |
|-------------------------------|---|------------------------------------|---|------------------------|
| Format | All regulatory FinfraG inbound and outbound reports are formatted and contained in CSV or XML files. Note: The files are not compressed using ZIP or other algorithms. | | | |
| CSV file structure | CSV files generally have several rows of header information, one to many rows of body data and one trailer row. The field (column) separator is semicolon (;). There are two specific CSV templates available in the <i>Schemas</i> section of the FinfraG Dashboard. | | | |
| XML file structure | <p>XML files exchanged with REGIS-TR contain:</p> <ol style="list-style-type: none"> a XML prologue <pre><?xml version="1.0" encoding="UTF-8"?></pre> message type. <p>The message types are defined in two schema collections, one per direction (inbound/outbound) that are available in the <i>Schemas</i> section of the FinfraG Dashboard.</p> | | | |
| Maximum file sizes | These depend on the connectivity option for inbound files, and the report type and contents for outbound files: | | | |
| | | SOAP | SFTP | FinfraG Dashboard |
| | Inbound to REGIS-TR | 4 MB | 250 MB | 4 MB |
| | Outbound from REGIS-TR | 20 MB | Maximum file sizes will fluctuate with different contents as outbound files are limited (paginated) to 500,000 records. | |
| Inbound and Outbound filename | <ul style="list-style-type: none"> This table shows the mandatory naming convention for files you send to REGIS-TR (Inbound files). Insert the character “_” between each field of the filename. | | | |
| | | Field | Format | Comment/Example |
| | 1 | Message direction (mandatory item) | 3 characters indicating the | INB (inbound messages) |

| | | | |
|---|-----------------------------------|---------------------------------|---|
| | | direction of the message | |
| 2 | Account ID | 2 uppercase letters + 4 numbers | REGIS-TR Account code of the sender. Examples: RF1111 |
| 3 | File type | Alphanumeric with 4 characters | LIVE (live messages) HIST (historical messages) |
| 4 | Date | YYYYMMDD | Date inbound file sent. |
| 5 | Time | HHMMSS | Time inbound file sent in UTC. |
| 6 | Client's own reference (optional) | Up to 50 letters and/or numbers | Ensures that files with the same sender, type, date and time are not mistaken for duplicates. Do not include special characters other than "_". |
| 7 | File extension | ".xml" or ".csv" | Not case-sensitive. |

Example: INBRF1111_LIVE_20210105_091100_REF5702357.xml

- This table shows the mandatory naming convention for responses that you receive from REGIS-TR (**outbound files**).
- The character "_" will be between each field of the filename.

| | Field | Format | Comment/Example |
|---|------------------------------------|--|--|
| 1 | Message direction (mandatory item) | 3 characters indicating the direction of the message | OUT (Outbound messages) |
| 2 | Account ID | 2 uppercase letters + 4 numbers | REGIS-TR Account code of the recipient. Examples: RF1111 |
| 3 | File type | Alphanumeric with 4 characters | LIVE (live messages) HIST (historical messages) |
| 4 | Date | YYYYMMDD | Date outbound file sent. |
| 5 | Time | HHMMSS | Time outbound file sent in UTC. |
| 6 | Client's own reference (optional) | Up to 50 letters and/or numbers | Quoted from the inbound filename if available. |

| | | | | |
|-------------------|---|----------------|------------------|--|
| | 7 | Number | 0 | Only applicable to Web Service and the Private Area. In Web Service once the file has been downloaded once, the number will change to 1. |
| | 8 | File extension | ".xml" or ".csv" | Not case-sensitive. |
| | <p>Example: OUTRF1111_LIVE_20210105_091100_REF5702357.xml</p> | | | |
| Batch submissions | When you send multiple files to REGIS-TR at the same time, the files are processed in the order they have been received by REGIS-TR. | | | |
| Transport methods | <ol style="list-style-type: none"> 1. SOAP Web Service 2. SFTP 3. FinfraG Dashboard <p>Further information: Connectivity Options.</p> | | | |

CONNECTIVITY OPTIONS

| | | | | | |
|---|--|------------------|--|------|---|
| Introduction | <ol style="list-style-type: none"> 1. REGIS-TR provides manual and automated connectivity options for: <ul style="list-style-type: none"> • the submission of derivative reports and updates, and • the reception of status messages, reports and other communications from REGIS-TR. 2. You are asked to specify these options when setting up your accounts. Note: These options can be modified at a later point, if required. 3. You have access to all reports and communications from REGIS-TR via your FinfraG Dashboard, regardless of the method chosen for the upload of derivative reports. | | | | |
| Manual upload/download | <p>If you are reporting on a small number of derivative contracts, it may be more efficient to upload reports manually via secure internet access in your FinfraG Dashboard. Note: This method can also be used as a contingency measure in the event of an issue with an automated file transfer.</p> | | | | |
| Automated file transfer options | <p>REGIS-TR offers two options for secure and automated file transfer and communications between the client and the TR. A client may combine the manual connectivity of the FinfraG Dashboard with one of the automated connectivity options:</p> <table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td style="width: 20%; padding: 5px;">SOAP Web Service</td> <td style="padding: 5px;">Platform-independent Internet service based on the open standards XML, SOAP, WSDL and HTTPS.</td> </tr> <tr> <td style="padding: 5px;">SFTP</td> <td style="padding: 5px;">Secure file transfer protocol over Internet connection. Secured with public key cryptography.</td> </tr> </table> | SOAP Web Service | Platform-independent Internet service based on the open standards XML, SOAP, WSDL and HTTPS. | SFTP | Secure file transfer protocol over Internet connection. Secured with public key cryptography. |
| SOAP Web Service | Platform-independent Internet service based on the open standards XML, SOAP, WSDL and HTTPS. | | | | |
| SFTP | Secure file transfer protocol over Internet connection. Secured with public key cryptography. | | | | |
| Automated file transfer options NF accounts | <p>REGIS-TR offers one option for secure and automated file transfer and communications between the client and the TR for NF accounts. SFTP will be available for NF accounts.</p> | | | | |
| Response messages | <p>REGIS-TR returns an acknowledgement in response to each file uploaded in the FinfraG Dashboard. For other feedback, see Reporting to clients.</p> | | | | |

Introduction

| | |
|-------------------------------------|--|
| SOAP Web Service | <ul style="list-style-type: none"> The SOAP Web Service enables interoperable machine-to-machine communications using the open standards XML, SOAP, WSDL and HTTPS. The use of these standards on a services platform enables client and service applications to communicate via multiple platforms and development languages. Clients use SOAP Web Service methods to set passwords, upload XML files and to search for and retrieve feedback and reports. These functions are available via a server connected to the internet. |
| SOAP | <p>Simple Object Access Protocol</p> <p>Platform- and language-independent XML-based protocol for accessing web services.</p> |
| WSDL | <p>Web Service Description Language</p> <p>Describes the external interface of the service.</p> <p>The WSDL file for the FinfraG service is published in the Guidance section of the FinfraG Dashboard. Note: There is one WSDL file for each environment (Production, UAT).</p> |
| Registration and access credentials | <p>Contact REGIS-TR for registration and access credentials.</p> <p>Notes:</p> <ul style="list-style-type: none"> Initially, you will be issued with a first-time password. You will need to change this before you start sending messages. You will need to provide your IP address or range of IP addresses |
| Accessing the SOAP Web Service | <ul style="list-style-type: none"> Within MED (Master Entity Data), select your account, then select Connectivity Details. Under Connectivity option SOAP Web Service the URL to access this service is displayed. |

Methods

| | |
|-----------------|---|
| Introduction | <p>This section sets out the methods used in the REGIS-TR SOAP Web Service. Unless noted otherwise, please see Return codes below for the responses of the methods.</p> |
| Change password | <p>To change your first-access password or to set a new password.</p> <p>Upon first access, the user will need to set up their password. An automatically generated secure e-mail for the password setup is sent to the email that the user has provided to REGIS-TR.</p> |

| | <p>This email contains a link allowing the user to set up their new password. The link should be used within 72 hours, at which time its validity expires.</p> <p>When the user clicks on the link within 72 hours, they are redirected to the password set-up screen.</p> <p>Syntax:</p> <table border="1" data-bbox="379 450 1265 638"> <thead> <tr> <th>Parameter name</th> <th>Parameter description</th> <th>Required</th> </tr> </thead> <tbody> <tr> <td>Username</td> <td>The username of the user.</td> <td>Y</td> </tr> <tr> <td>New password</td> <td>The chosen password of the user</td> <td>Y</td> </tr> <tr> <td>Confirm New Password</td> <td>The chosen password of the user.</td> <td>Y</td> </tr> </tbody> </table> | Parameter name | Parameter description | Required | Username | The username of the user. | Y | New password | The chosen password of the user | Y | Confirm New Password | The chosen password of the user. | Y | | | | | | |
|--|---|----------------|-----------------------|----------|----------|---|---|--------------|---|---|----------------------|------------------------------------|---|----------------|--|----------|-----------|--|----|
| Parameter name | Parameter description | Required | | | | | | | | | | | | | | | | | |
| Username | The username of the user. | Y | | | | | | | | | | | | | | | | | |
| New password | The chosen password of the user | Y | | | | | | | | | | | | | | | | | |
| Confirm New Password | The chosen password of the user. | Y | | | | | | | | | | | | | | | | | |
| <p>Send file</p> | <p>To send XML or CSV files.</p> <p>Syntax:</p> <table border="1" data-bbox="379 808 1305 1202"> <thead> <tr> <th>Parameter name</th> <th>Parameter description</th> <th>Required</th> </tr> </thead> <tbody> <tr> <td>user</td> <td>The user that is executing the request.</td> <td>Y</td> </tr> <tr> <td>password</td> <td>The current password of the user that is executing the request.</td> <td>Y</td> </tr> <tr> <td>file_content</td> <td>The complete message in CSV or XML</td> <td>Y</td> </tr> <tr> <td>file_name</td> <td>The name of the file without the indicator of direction. The system must be able to set this indicator</td> <td>Y</td> </tr> <tr> <td>file_type</td> <td>The type of message sent. Allow values are CSV or XML</td> <td>Y</td> </tr> </tbody> </table> <p>Parameter 'file_name' must follow a specific naming convention described in the section File structure and submission.</p> | Parameter name | Parameter description | Required | user | The user that is executing the request. | Y | password | The current password of the user that is executing the request. | Y | file_content | The complete message in CSV or XML | Y | file_name | The name of the file without the indicator of direction. The system must be able to set this indicator | Y | file_type | The type of message sent. Allow values are CSV or XML | Y |
| Parameter name | Parameter description | Required | | | | | | | | | | | | | | | | | |
| user | The user that is executing the request. | Y | | | | | | | | | | | | | | | | | |
| password | The current password of the user that is executing the request. | Y | | | | | | | | | | | | | | | | | |
| file_content | The complete message in CSV or XML | Y | | | | | | | | | | | | | | | | | |
| file_name | The name of the file without the indicator of direction. The system must be able to set this indicator | Y | | | | | | | | | | | | | | | | | |
| file_type | The type of message sent. Allow values are CSV or XML | Y | | | | | | | | | | | | | | | | | |
| <p>Request list with all the timestamps and file names available</p> | <p>This method Get_complete_list retrieves a list with all the timestamps and file names available with an upper limit.</p> <p>If the limit is exceeded a flag indicating that more responses are left is returned and the last file name written in the response must be used in the following request.</p> <p>These steps should be repeated until no further files are left in the server.</p> <p>Syntax:</p> <table border="1" data-bbox="379 1650 1305 1834"> <thead> <tr> <th>Parameter name</th> <th>Parameter description</th> <th>Required</th> </tr> </thead> <tbody> <tr> <td>user</td> <td>The user that is executing the request.</td> <td>Y</td> </tr> <tr> <td>password</td> <td>The current password of the user that is executing the request.</td> <td>Y</td> </tr> <tr> <td>last_file_name</td> <td>The complete message in CSV or XML</td> <td>N</td> </tr> </tbody> </table> <p>Returns:</p> <table border="1" data-bbox="379 1933 1305 2033"> <thead> <tr> <th>Parameter name</th> <th>Parameter description</th> <th>Required</th> </tr> </thead> <tbody> <tr> <td>list</td> <td>Array with all the names and dates of the files found.</td> <td>NA</td> </tr> </tbody> </table> | Parameter name | Parameter description | Required | user | The user that is executing the request. | Y | password | The current password of the user that is executing the request. | Y | last_file_name | The complete message in CSV or XML | N | Parameter name | Parameter description | Required | list | Array with all the names and dates of the files found. | NA |
| Parameter name | Parameter description | Required | | | | | | | | | | | | | | | | | |
| user | The user that is executing the request. | Y | | | | | | | | | | | | | | | | | |
| password | The current password of the user that is executing the request. | Y | | | | | | | | | | | | | | | | | |
| last_file_name | The complete message in CSV or XML | N | | | | | | | | | | | | | | | | | |
| Parameter name | Parameter description | Required | | | | | | | | | | | | | | | | | |
| list | Array with all the names and dates of the files found. | NA | | | | | | | | | | | | | | | | | |

| | <table border="1"> <tr> <td data-bbox="376 203 616 304">continuation</td> <td data-bbox="616 203 1166 304">Flag to show that the list is not completed. In this case, more requests to this method should be launched in order to get the remaining files.</td> <td data-bbox="1166 203 1302 304">NA</td> </tr> </table> | continuation | Flag to show that the list is not completed. In this case, more requests to this method should be launched in order to get the remaining files. | NA | | | | | | | | | | | | | | | | | | | | | |
|---|---|----------------|---|----------|------|---|---|----------|---|---|------|--|---|----------------|---------------------------------------|----------|----------------|---|----------|--------|--|----|---------|--------------------------|----|
| continuation | Flag to show that the list is not completed. In this case, more requests to this method should be launched in order to get the remaining files. | NA | | | | | | | | | | | | | | | | | | | | | | | |
| Request list of pending files | <p>The method Get_files retrieves the list of pending files for the requested date.</p> <p>Syntax:</p> <table border="1"> <thead> <tr> <th>Parameter name</th> <th>Parameter description</th> <th>Required</th> </tr> </thead> <tbody> <tr> <td>user</td> <td>The user that is executing the request.</td> <td>Y</td> </tr> <tr> <td>password</td> <td>The current password of the user that is executing the request.</td> <td>Y</td> </tr> <tr> <td>date</td> <td>The date to search. Date should be in YYYY-MM-DD format.</td> <td>Y</td> </tr> </tbody> </table> <p>Returns:</p> <table border="1"> <thead> <tr> <th>Parameter name</th> <th>Parameter description</th> <th>Required</th> </tr> </thead> <tbody> <tr> <td>result</td> <td>In case the method retrieves information, an integer must be returned indicating the number of files listed</td> <td>NA</td> </tr> <tr> <td>list</td> <td>Array with all the names of the files found.</td> <td>NA</td> </tr> </tbody> </table> | Parameter name | Parameter description | Required | user | The user that is executing the request. | Y | password | The current password of the user that is executing the request. | Y | date | The date to search. Date should be in YYYY-MM-DD format. | Y | Parameter name | Parameter description | Required | result | In case the method retrieves information, an integer must be returned indicating the number of files listed | NA | list | Array with all the names of the files found. | NA | | | |
| Parameter name | Parameter description | Required | | | | | | | | | | | | | | | | | | | | | | | |
| user | The user that is executing the request. | Y | | | | | | | | | | | | | | | | | | | | | | | |
| password | The current password of the user that is executing the request. | Y | | | | | | | | | | | | | | | | | | | | | | | |
| date | The date to search. Date should be in YYYY-MM-DD format. | Y | | | | | | | | | | | | | | | | | | | | | | | |
| Parameter name | Parameter description | Required | | | | | | | | | | | | | | | | | | | | | | | |
| result | In case the method retrieves information, an integer must be returned indicating the number of files listed | NA | | | | | | | | | | | | | | | | | | | | | | | |
| list | Array with all the names of the files found. | NA | | | | | | | | | | | | | | | | | | | | | | | |
| Retrieve the contents of one file by date | <p>To retrieve the content of one XML or CSV file for a certain date.</p> <p>Syntax:</p> <table border="1"> <thead> <tr> <th>Parameter name</th> <th>Parameter description</th> <th>Required</th> </tr> </thead> <tbody> <tr> <td>user</td> <td>The user that is executing the request.</td> <td>Y</td> </tr> <tr> <td>password</td> <td>The current password of the user that is executing the request.</td> <td>Y</td> </tr> <tr> <td>date</td> <td>The date to search. Date should be in YYYY-MM-DD format.</td> <td>Y</td> </tr> <tr> <td>file_name</td> <td>The name of the file to be retrieved.</td> <td>Y</td> </tr> </tbody> </table> <p>Returns:</p> <table border="1"> <thead> <tr> <th>Parameter name</th> <th>Parameter description</th> <th>Required</th> </tr> </thead> <tbody> <tr> <td>result</td> <td>In case of error, the function must return an integer lower than zero.</td> <td>NA</td> </tr> <tr> <td>content</td> <td>The content of the file.</td> <td>NA</td> </tr> </tbody> </table> | Parameter name | Parameter description | Required | user | The user that is executing the request. | Y | password | The current password of the user that is executing the request. | Y | date | The date to search. Date should be in YYYY-MM-DD format. | Y | file_name | The name of the file to be retrieved. | Y | Parameter name | Parameter description | Required | result | In case of error, the function must return an integer lower than zero. | NA | content | The content of the file. | NA |
| Parameter name | Parameter description | Required | | | | | | | | | | | | | | | | | | | | | | | |
| user | The user that is executing the request. | Y | | | | | | | | | | | | | | | | | | | | | | | |
| password | The current password of the user that is executing the request. | Y | | | | | | | | | | | | | | | | | | | | | | | |
| date | The date to search. Date should be in YYYY-MM-DD format. | Y | | | | | | | | | | | | | | | | | | | | | | | |
| file_name | The name of the file to be retrieved. | Y | | | | | | | | | | | | | | | | | | | | | | | |
| Parameter name | Parameter description | Required | | | | | | | | | | | | | | | | | | | | | | | |
| result | In case of error, the function must return an integer lower than zero. | NA | | | | | | | | | | | | | | | | | | | | | | | |
| content | The content of the file. | NA | | | | | | | | | | | | | | | | | | | | | | | |
| Retrieve the content of all files by date | <p>This method Recover_files retrieves the content of all the files available on a certain date.</p> <p>Syntax:</p> <table border="1"> <thead> <tr> <th>Parameter name</th> <th>Parameter description</th> <th>Required</th> </tr> </thead> <tbody> <tr> <td>user</td> <td>The user that is executing the request.</td> <td>Y</td> </tr> <tr> <td>password</td> <td>The current password of the user that is executing the request.</td> <td>Y</td> </tr> <tr> <td>date</td> <td>The date to search. Date should be in YYYY-MM-DD format.</td> <td>Y</td> </tr> </tbody> </table> <p>Returns:</p> <table border="1"> <thead> <tr> <th>Parameter name</th> <th>Parameter description</th> <th>Required</th> </tr> </thead> <tbody> <tr> <td></td> <td></td> <td></td> </tr> </tbody> </table> | Parameter name | Parameter description | Required | user | The user that is executing the request. | Y | password | The current password of the user that is executing the request. | Y | date | The date to search. Date should be in YYYY-MM-DD format. | Y | Parameter name | Parameter description | Required | | | | | | | | | |
| Parameter name | Parameter description | Required | | | | | | | | | | | | | | | | | | | | | | | |
| user | The user that is executing the request. | Y | | | | | | | | | | | | | | | | | | | | | | | |
| password | The current password of the user that is executing the request. | Y | | | | | | | | | | | | | | | | | | | | | | | |
| date | The date to search. Date should be in YYYY-MM-DD format. | Y | | | | | | | | | | | | | | | | | | | | | | | |
| Parameter name | Parameter description | Required | | | | | | | | | | | | | | | | | | | | | | | |
| | | | | | | | | | | | | | | | | | | | | | | | | | |

| | | | | | | | |
|--------|--|--------|--|----|------|---|----|
| | <table border="1"> <tr> <td>result</td> <td>In case of error, the function must return an integer lower than zero. Otherwise, this parameter should not be returned.</td> <td>NA</td> </tr> <tr> <td>list</td> <td>Array with all the names and dates of the content files found</td> <td>NA</td> </tr> </table> | result | In case of error, the function must return an integer lower than zero. Otherwise, this parameter should not be returned. | NA | list | Array with all the names and dates of the content files found | NA |

| list | Array with all the names and dates of the content files found | NA | | | | | |

Best practices

| | |
|--------------------------------|---|
| Sending message files | Include as many messages as possible in each submission file. Reason: Minimises the number of connections needed. Maximum size of the message is 4 MB. |
| Retrieving files from REGIS-TR | <p>If the 20 MB limit is exceeded when retrieving multiple files, use the method to download files one by one.</p> <p>After you retrieve a file using SOAP Web Service, REGIS-TR will set the retrieval indicator in the file name to 1 and move the file to an archive. The report files are still available in the FinfraG Dashboard and by special request made to the Client Services team.</p> |
| Timeframe threshold | <ol style="list-style-type: none"> The same user may invoke different methods in parallel The same method invoked repeatedly by the same user in a short timeframe may produce errors with -11 return code. You can avoid this by introducing a delay between the calls. |
| Connection frequency | Leave as much time as possible between connections. Reason: This minimises the number of checking and message retrieval connections. |

Error codes

| Codes and descriptions | Return code | Description |
|------------------------|-------------|---|
| | -1 | One or more search parameters incorrect |
| | -2 | No results found with the search parameters received |
| | -3 | You do not have permission to retrieve the requested data, or Your credentials have failed validation. Note: This error can occur if your IP address is not registered |
| | -4 | An error occurred when trying to access your data |
| | -5 | Change of first-time password required |
| | -6 | File size exceeded. Please refer to method recover_file to recover the files one by one. File size exceeded. |

| | | |
|--|-----|--|
| | -11 | The user has established concurrent connections at the same time, or the connections established have surpassed the timeframe threshold between connections. |
|--|-----|--|

SFTP

| | |
|----------------------|---|
| Introduction | Secure File Transfer Protocol (SFTP) is a secure network protocol for the transfer and management of files between remote systems. |
| This section covers: | <ol style="list-style-type: none"> 1. Security and configuration 2. Connecting to the server 3. Server information |

Security and configuration

| | |
|-----------------------------|--|
| Introduction | <ul style="list-style-type: none"> • Access to the server is secured using public keys. • This section sets out the technical specifications to be followed during configuration. |
| Public key | <p>You need to generate a public key to send and retrieve files.</p> <p>Conditions:</p> <ul style="list-style-type: none"> • Encrypted RSA • Minimum 2048 bits • Compatible with OpenSSH |
| Contact REGIS-TR | Contact REGIS-TR's Account Setup Team to request the setup of the connection. Note: You will need to provide your public key(s) and IP addresses. |
| Client server configuration | <p>The client configuration set out below is for the REGIS-TR Production and UAT environments.</p> <p>Note: REGIS-TR does not support sha1 or md5 algorithms.</p> <p>KexAlgorithms:</p> <ul style="list-style-type: none"> • diffie-hellman-group-exchange-sha256 • curve25519-sha256@libssh.org • ecdh-sha2-nistp521 • ecdh-sha2-nistp384 • ecdh-sha2-nistp256 <p>MACs:</p> <ul style="list-style-type: none"> • hmac-sha2-512-etm@openssh.com |

| | |
|--|---|
| | <ul style="list-style-type: none"> • hmac-sha2-256-etm@openssh.com • hmac-sha2-512 • hmac-sha2-256 <p>Ciphers:</p> <ul style="list-style-type: none"> • chacha20-poly1305@openssh.com • aes256-gcm@openssh.com • aes256-ctr • aes192-ctr • aes128-ctr |
|--|---|

Connecting to the SFTP server

| | |
|------------------------|---|
| Introduction | <p>This section sets out the details needed to connect to the SFTP server. It covers:</p> <ol style="list-style-type: none"> 1. Production environment 2. UAT environment |
| User restrictions | <p>One user only per environment. Note: The username must be entered in lower case.</p> |
| Production environment | <p>URL: sftp.finfragregis-tr.com</p> <p>IP address: 193.110.154.94 port: 55222</p> <p>Username: rp + account code. Example: rprf6001.</p> |
| UAT environment | <p>URL: uatsftp.finfragregis-tr.com</p> <p>IP address: 193.110.154.93 port: 55222</p> <p>Username: rf + account code. Example: rfrf6001.</p> |

Server information

| | |
|---------------|--|
| Server folder | <p>There is one folder that you have read and write permission to: Datos.</p> <ol style="list-style-type: none"> 1. Use the Put command to upload files to REGIS-TR. 2. After processing, an uploaded file is removed from the Datos folder, and a response file will be available. 3. Use the Get command to download files from REGIS-TR. <p>Notes:</p> <p>Inbound and Outbound filename can be found in File structure and submission section. If the filename is not followed, the file will not be processed.</p> <p>You can only access the Datos folder. Any other folders are for REGIS-TR own use.</p> |
|---------------|--|

| | |
|------------------------|---|
| System security | <ol style="list-style-type: none"> 1. Inactive connections are closed by REGIS-TR after ten minutes. 2. There can be up to ten concurrent connections from one IP address. 3. Up to twenty connections can be opened in the same minute from one IP address. 4. A user (i.e. account) with an open connection must leave four minutes before opening a parallel connection from the same IP address. |
| File store maintenance | <p>REGIS-TR applies maintenance policy for the reports/responses which are drop in your SFTP folder. Below you can find how long the reports/responses will be available:</p> <p>LIVE -> 4 natural days HIST -> 4 natural days D501 -> 7 natural days D532 -> 7 natural days W540 -> 31 natural days P454 -> 91 natural days P455 -> 91 natural days P455 -> 91 natural days</p> |

FinfraG Dashboard

| | |
|-------------------------------|---|
| Introduction | <p>Your FinfraG Dashboard can be used to manually upload and download files if:</p> <ul style="list-style-type: none"> • You handle low volumes of transactions, or • You are experiencing problems with your automated connectivity option. |
| Prerequisites to upload files | <p>Users with read and write permissions.</p> <p>Note: Signature key needed.</p> |
| Upload procedure | <ol style="list-style-type: none"> 1. Use an up-to-date Internet browser to open the desired environment, see Log in to your FinfraG Dashboard. 2. Select <i>File Upload</i> from the sidebar. 3. Choose the file that contains your FinfraG reporting, enter the signature key and upload the report. |
| Download procedure | <p>Please see Viewing and retrieving reports.</p> |

VALIDATION

| | |
|-------------------------|---|
| Introduction | Validation is performed on submitted files with derivative records and lifecycle reports |
| Validation rules | Please refer to FINMA's Financial Market Infrastructure Ordinance, FinMIO and REGIS-TR's inbound formats available in the FinfraG Dashboard in our Production and UAT environments for definitions on usage and formatting. |
| Timing | Your derivative reports are processed by REGIS-TR in the order they were recorded in each file. Note: This is regardless of which connectivity method was used to submit them. |

Validation process

| | |
|----------------------------------|---|
| Report validation process | <ol style="list-style-type: none"> 1. REGIS-TR authenticates the sender and the account type used to submit the report. If the authentication fails, the file is rejected, and the sender is notified. If the sender is authenticated, the file passes to the next validation stage. 2. REGIS-TR validates the file size and system availability. If the validation fails, the file is rejected, and the sender is notified. If the validation is successful, the file passes to the next validation stage. 3. REGIS-TR validates the file name. If the validation fails, the file is rejected, and the sender is notified. If the validation is successful: <ol style="list-style-type: none"> a. The file is accepted and assigned a received timestamp, and b. the file passes to the next validation stage. 4. REGIS-TR validates the file against the relevant XML schemas. If the validation fails, the file is rejected, and the sender is notified of the error code in an intraday message. If the validation is successful, the file passes to the next validation stage. 5. REGIS-TR validates the records in the message against permission, logical and business rules. 6. When the validation of all the records in one file is complete, REGIS-TR generates an intraday message containing the validation results. This is sent during the hours of REGIS-TR system availability. <p>Notes:</p> <ul style="list-style-type: none"> • When a record fails permission validation, it is rejected without further validation. • A file that is not processed due to system unavailability will be queued until the system is available. • A file may have accepted status even if all records have failed the validations. |
|----------------------------------|---|

REPORTING TO CLIENTS

Introduction

| | |
|---|---|
| Introduction | This section describes the outbound reports sent to you from REGIS-TR. |
| Report types | <p>Intraday: Sent in response to an inbound file and validation.</p> <p>End of day: Sent at the end of the working day.</p> <p>Weekly: Sent at the end of the last working day of the week.</p> <p>Monthly: Billing reports</p> |
| Receiving reports | <ol style="list-style-type: none"> Intraday validation feedback responses to inbound reports sent by you are generated in the format (CSV or XML) of the report being responded to. These responses will be only sent to the channel used to send the inbound file. Other outbound reports are sent to you using the connectivity option selected when your account was set up. The reports are also available for a period in the Outbound section in your FinfraG Dashboard. The period of this availability depends on the type of report. <p>Note: After this period, reports can be retrieved upon request to REGIS-TR</p> |
| Access to reports after account has been closed | Historical reports can be retrieved by request to REGIS-TR. The report will be provided when REGIS-TR has validated the authentication and authorisation of the requestor. |

Report/feedback cycle

| | | | |
|-----------------|---|---|--------------|
| Introduction | The table below shows when outbound reports are sent. | | |
| Reporting cycle | Process | Feedback/Report | Timing |
| | Client submits derivatives reporting file | | |
| | REGIS-TR receives file | Acknowledgement (return code) of file receipt. "File upload successfully" will be showed on the private area if the file has been submitted through that channel. | Upon receipt |
| | If the file fails sender authentication | The sender receives a failure notification. Failure messaged will be showed on the private area if the file has been submitted through that channel. | Immediate |

| | | |
|--|---|---|
| <p>Validation of message file and derivative records</p> | <p>Message Rejected Report / Message Accepted Report (LIVE/HIST)</p> <ul style="list-style-type: none"> Provides the derivative message file validation status. Note: In case of rejections, error reasons are provided to the extent possible. Lists the accepted/rejected status of each derivative record in the message. Note: Rejection error codes and error description included where applicable. | <p>During REGIS-TR system availability.</p> |
| <p>After end of reporting session</p> | <p>Trade Status Report (D501) Current trade state of each outstanding derivative in the client's account</p> | <p>End of the day</p> |
| | <p>Messages (D532) Includes all the inbound messages related to the trades/positions in the client's account.</p> | |
| <p>End of business week</p> | <p>Full Table Live Contracts (W540) Provides the latest status of each active derivative</p> | <p>End of business week</p> |
| <p>Monthly (Invoice/billing reports)</p> | <p>Reporting and Maintenance Fee for EF/TF accounts (P455) Provides the list of the Trade IDs that incurred a reporting and Maintenance fee for the account receiving the report.</p> | <p>Following invoice period</p> |
| | <p>Reporting and Maintenance Fee for RF accounts (P454) Provides the list of the Trade IDs that incurred a reporting and maintenance fee for the account receiving the report</p> | |
| | <p>Summary Billing Reports for RF/TF/EF accounts (P456) This report will include a summary of the fees applied to the account which receives the report. Each line of the report will be a unique combination of Reporting</p> | |

Counterparty 1 + Reporting Submitting Entity + Fee
Code which has been charged to the account.

Intraday reports

| | |
|---------------------|---|
| Introduction | <p>These automatically generated reports are sent in response to a derivative submission, validation or other process.</p> <p>These are:</p> <ol style="list-style-type: none"> 1. File accepted 2. File partially accepted 3. File rejected |
| Availability | <p>Only available in the channel which has been used to upload the inbound file. Available for three working days in the <i>Output</i> section of the FinfraG Dashboard.</p> |

LIVE/HIST – Intraday messages

| | | | |
|---------------------|---|-------------------------|--|
| Purpose | <ol style="list-style-type: none"> 1. Provides the validation status 2. When a derivative report has been rejected, the Status Advice Feedback provides information on the error. <p>Note: This feedback may not be sent if your upload channel rejects the message file owing to failure of sender authentication. In this case, rejection notification would come from the authentication process in the connectivity channel.</p> | | |
| Time sent | During REGIS-TR system availability. | | |
| Report ID | HIST/LIVE Message Received/Valuation Received | | |
| Format | Format: CSV and XML | | |
| Status codes | Code | Name | Further information |
| | ACEP | File accepted | Inbound message file has passed all validations. |
| | PART | File partially accepted | Inbound message file has failed some validation. |
| | RJCT | File rejected | Inbound message file has been rejected. |
| Distribution | Available to Reporting Participants and Third Parties. | | |

End of day reports

| | |
|---------------------|--|
| Introduction | These automatically generated reports are sent after the close of the daily reporting session. |
| Availability | <ul style="list-style-type: none"> • Available for six working days in the <i>Reports</i> section of the FinfraG Dashboard. • After that period, upon request. |

D501 – Trade Status Report

| | |
|---------------------|---|
| Purpose | Provides information about the latest status of all trades that have been submitted or modified during the reporting session. |

| | |
|--------------|---|
| Content | <ul style="list-style-type: none"> • Counterparty ID • Submitting Entity ID • Fee Code • Fee Code Description • Quantity • Fee Amount |
| Distribution | Available to Reporting Participants and Third Parties. |

Viewing and retrieving reports

| | |
|---------------------|--|
| Introduction | Use the <i>Output</i> and <i>Reports</i> sections in the FinfraG Dashboard to search for, view and export among the available outbound reports from REGIS-TR to you. Note: Your reports are available here regardless of any automated connectivity option you may use. |
| Search for a report | <p>To retrieve a specific report:</p> <ol style="list-style-type: none"> 1. Intraday reports <ol style="list-style-type: none"> a. Select Output > Response files 2. End of Day reports <ol style="list-style-type: none"> a. Select Reports and a frequency <ul style="list-style-type: none"> • Daily Reports • Weekly Reports • Monthly Reports b. Select the number of lines to show (between 10 to 100) results. c. To view/export the full report, select one report. |

Search for submitted derivative records

| | |
|--------------|---|
| Start Search | <p>Select Search, then Trade or Portability.</p> <ol style="list-style-type: none"> 1. For Search Trade, please select further as required: <ul style="list-style-type: none"> • Date Interval From (mandatory field) • Date Interval To (mandatory field) • Trade ID • Reporting Timestamp • Counterparty 1 • Counterparty 2 • Report Level |
|--------------|---|

| | | |
|----------------|--|--|
| | <ul style="list-style-type: none"> • Report Type • Internal Client Code <p>2. For Search Portability, please select further as required:</p> <ul style="list-style-type: none"> • Date from (mandatory field) • Date to (mandatory field) • Trade ID • New Account | |
| Permissions | The reports that can be retrieved depend on the user's account type: | |
| | Account type | Role of the account holder in the derivative records |
| | Reporting Participant (RF) | Report Submitting Entity, Reporting Counterparty |
| | Third Party (TF or EF) | Report Submitting Entity |
| Search results | <ol style="list-style-type: none"> 1. You will receive maximum 1000 results per query. If necessary, refine your search. 2. Search results can be shown in groups of 10, 25, 50 or 100 per page. 3. To view a full derivative report, click on its Trade ID in the results list. 4. To download a report, use the Download button. | |

Report status view in the FinfraG Dashboard

| | |
|------------------|--|
| Introduction | Your FinfraG Dashboard offers a graphic view of reporting activity by status. |
| Reporting Status | <p>This displays a summary of your reporting with:</p> <ol style="list-style-type: none"> 1. Pie charts covering your report submissions for the current working day in four groups. Click on the respective View Details to see: <ul style="list-style-type: none"> • Total Files – the numbers of processed, pending and erroneous files. • Processed Files – a list of the accepted files, and you can set the filter to another date. • Pending Files – a list of files in the processing queue. • Erroneous Files – a list of rejected files. 2. The Recent Activity box has a graph with the reporting activity over time. 3. Recent Files is a search tool that displays sortable results list in groups of 10, 25, 50 or 100 files per page. |

ACCOUNT SETUP SERVICES

| | |
|--|---|
| <p>Onboarding and account setup</p> | <ol style="list-style-type: none"> 1. There are two stages to the creation of accounts for new clients: <ol style="list-style-type: none"> a. Onboarding: the entity or institution applies to open an account and provides legal and contractual information. b. Account setup: this is the technical setup of the account, which can be done after the entity has become a REGIS-TR client. 2. Clients wishing to use REGIS-TR for their FinfraG reporting are invited to download the onboarding documents from REGIS-TR's website under Key documents > REGIS-TR S.A. |
| <p>Requesting an account</p> | <ol style="list-style-type: none"> 1. Clients and other entities can contact REGIS-TR by phone or email to request an account. Further information: see Contacts. 2. The process of applying for a new account depends on whether the account is for the: <ul style="list-style-type: none"> • UAT environment for testing and training, or • Production environment for the live derivative reporting service. Note: Also provides access to UAT environment. |
| <p>New clients: Documentation request</p> | <p>If you are not currently a REGIS-TR client, we will email you with:</p> <ol style="list-style-type: none"> 1. A message confirming your new account request. 2. A request to print, sign and return the following documents: <ol style="list-style-type: none"> a. Agreement relating to your requested REGIS-TR account type, and b. FinfraG Application form (Appendix 2). Note: This includes the information needed to define your Central Coordinator. c. SEPA mandate for REGIS-TR to make direct debits for the payments of invoices. 3. A request for copies of your company's: <ol style="list-style-type: none"> a. Articles of Association (up to date) b. Banking or Business License to operate under Luxembourg or other national law, dated within the last 6 months c. Excerpt from company register including certificate of residency, dated within the last 6 months d. Up to date official list of authorised signatures, plus specified authentication information <p>Note: If your company documents are not in English or Spanish, please provide:</p> <ul style="list-style-type: none"> • copies of the original documents, and • for each document, a legally authorised translation into one of these languages. <p>Complete, print, sign and return these documents by post to the address on the FinfraG Appendix 2 – Application Form.</p> |

| | |
|--|--|
| <p>Billing</p> | <p>REGIS-TR provides electronic invoices by default to the email address provided in the Account Request form for this purpose. REGIS-TR recommends that you create an email distribution list for the electronic invoices to reach several individuals.</p> |
| <p>Current REGIS-TR clients (non-FinfraG) documentation request</p> | <p>If you are a client of a different REGIS-TR service and wish to subscribe to the FinfraG service, you will receive:</p> <ol style="list-style-type: none"> 1. A message confirming your new account request 2. A request to print, sign and return the following documents: <ol style="list-style-type: none"> a. Agreement relating to your requested REGIS-TR account type, and b. FinfraG Appendix 2 – Application form. Note: This includes the information needed to create your Central Coordinator. c. If not already done, the SEPA mandate for REGIS-TR to make direct debits for the payments of invoices. 3. A request for copies of any of the following, if they have been updated since you last provided them to REGIS-TR: <ol style="list-style-type: none"> a. Articles of Association b. Banking or Business License to operate c. Excerpt from company register including certificate of residency d. Up to date official list of authorised signatures, plus specified authentication information <p>Note: If your company documents are not in English or Spanish, please provide:</p> <ul style="list-style-type: none"> • copies of the original documents, and • for each document, a legally authorised translation into one of these languages. |
| <p>Account setup</p> | <p>Once your documentation has been verified, REGIS-TR will:</p> <ol style="list-style-type: none"> 1. Set up your account in the secure Production environment 2. Create access credentials for your Central Coordinator, and Users, and 3. Send an email to your Central Coordinator and Users with a password set-up link. <p>Note: Production account clients also have access to the UAT environment.</p> |
| <p>Central Coordinator</p> | <p>Entities are required to have one Central Coordinator.</p> <p>The Central Coordinator:</p> <ul style="list-style-type: none"> • is the central point of contact for communications with REGIS-TR • is authorised to request new accounts, modification of account options such as the outbound report selection, and the addition, modification and deactivation of users. |

USER ACCESS TO THE FinfraG DASHBOARD

Access and credentials

Create user password

| | |
|---------------------------------|--|
| <p>This section applies to:</p> | <p>New users. Note: Your username is assigned by REGIS-TR.</p> |
| <p>Create password</p> | <ol style="list-style-type: none"> 1. Follow the link in the email provided when your user account was set up. 2. Your username is pre-filled. 3. At first log in, REGIS-TR will ask you to change the initial password. The new password must contain: <ol style="list-style-type: none"> a. Eight to thirty characters b. At least three of the following: <ul style="list-style-type: none"> • Upper case alphabetical letter A-Z • Lower case alphabetical letter a-z • Number 0-9 • Symbol, punctuation or special character 4. Submit the request. |
| <p>Initial password expiry</p> | <p>You must log in within 72 hours of receiving the link provided for that purpose. If you do not, an error message appears, and you need to reset your password using the “Password reset” function, where you should use the Username that was assigned to you by REGIS-TR and then choose and confirm your new password.</p> |

Log in to your FinfraG Dashboard

| | |
|--|---|
| <p>This section applies to:</p> | <p>New users New Central Coordinators.</p> |
| <p>Access to the FinfraG Dashboard</p> | <ol style="list-style-type: none"> 1. Open an Internet browser on your computer and either: <ol style="list-style-type: none"> a. Go to the REGIS-TR website, click on the green Login button, select the FinfraG tab and click on the desired environment: Production or UAT; or b. Click on or enter the relevant link/URL of an environment: <ul style="list-style-type: none"> • Production: https://web.finfragregis-tr.com/ • UAT: https://uatweb.finfragregis-tr.com 2. Enter your username and password to access your FinfraG Dashboard. |

| | |
|------------|---|
| | Tip: Add the desired log in page(s) to the bookmarks or favourites of your Internet browser. |
| Next login | Your user profile will be blocked if you have not logged in during 90 consecutive days. REGIS-TR automatically generates reminder emails prompting the user to change their password before it expires. |

Signature key and secret question

| | |
|--|---|
| Introduction | <ul style="list-style-type: none"> • Users are required to set up a signature key. • The Signature Key is an eight-letter/number key known only to its user, used as an additional form of verification. • It is used to confirm the user’s identity before performing an operation such as a file upload. The user is asked to enter three random characters from the key. • The user also sets up a secret question to which only the user knows the answer. This is used if the user needs to reset their signature key. • REGIS-TR will never ask a user for the full signature key. |
| This section applies to: | New users and existing users whose username is blocked. |
| How to create or change your signature key | <ol style="list-style-type: none"> 1. In the <i>User information</i> section, select <i>Change signature</i>. 2. Enter and confirm your new signature. <p>Note: Current signature field must be left blank when setting up the signature for the first time.</p> |
| How to create or change your secret question | <ol style="list-style-type: none"> 1. In the <i>User information</i> section, select <i>Change signature</i>. 2. Enter your new secret question. Note: Maximum 30 letters. 3. Enter your new secret answer. Note: Maximum 10 letters. 3. Click <i>Change Signature</i> button. |
| Information entered incorrectly | <ol style="list-style-type: none"> 1. If you enter signature key/secret question information incorrectly three times, your signature key will be blocked. 2. In this case, contact your Central Coordinator. |

Password expiry

| | |
|----------------|--|
| Introduction | The initial password provided expires after 72 hours. Normal production passwords expire after 90 days. |
| Reset password | <ul style="list-style-type: none"> • You will receive an email alert when the password is reaching the expiration date. |

| | |
|--|--|
| | <ul style="list-style-type: none"> Follow the Password Reset instructions in the email. |
|--|--|

Session expiry

| | |
|--------------|---|
| Introduction | <ul style="list-style-type: none"> For security reasons, your session will close after 30 minutes of inactivity. To stop the session closure, take any action on the screen. To reopen the session, log back in. If you enter an incorrect username or password, you will see a warning message. If you have forgotten your password or username, use the Password reset function. |
|--------------|---|

Wrong username

| | |
|---------------------------------------|--|
| Forgotten username | If you have forgotten your username, please contact your Central Coordinator or the Account Setup Team . |
| Login credentials entered incorrectly | <ul style="list-style-type: none"> You will see an error message. Verify your login credentials and re-enter your username and password. |

Logging out

| | |
|---------------|---|
| Logout button | Press the Logout button in the upper right-hand corner to end your session. |
|---------------|---|

Menu items

Main

| | |
|---------|---|
| Purpose | Provides list of Main menu items. |
| Detail | <ul style="list-style-type: none"> Reporting Status: summaries of processed, pending and erroneous files. See Report status view in the FinfraG Dashboard. Inputs: manual upload of XML and CSV message files. Output: display intra-day response files. See Viewing and retrieving reports. Search Trade: look up trade records. INFRASTRUCTURE

| | |
|-------------------|--|
| Introduction | <p>REGIS-TR offers a robust, high-capacity technical infrastructure with a range of secure connectivity methods and message formats to enable clients to streamline their reporting. The reporting solutions of REGIS-TR and our sister company have been designed with the capacity to process the significant volumes of data associated with FinfraG, EMIR, SFTR and UK EMIR in a secure, seamless and efficient way.</p> <p>Our platform supports distributed processing and is optimised continuously process a substantial amount of data during each reporting session. The multi-channel reporting framework enables parallel real-time processing through each reporting channel.</p> |
| Hardware | Database and system storage is based on a storage array system. |
| Operating systems | Oracle Linux and Windows Server. |
| Datacentres | <p>All our systems are hosted in our own datacentres.</p> <p>Note: For contingency reasons, we run two identical datacentres in parallel.</p> |

Updates and new releases

| | |
|-----------------------|---|
| Software updates | <p>REGIS-TR publishes an annual roadmap detailing planned software enhancements and updates. This is updated regularly and communicated to clients.</p> <p>Before each release, detailed release notes are issued describing the enhancements and setting out any potential impact.</p> |
| Release testing | <ul style="list-style-type: none"> • Software changes are grouped together in releases to enable us to minimise the impact on clients and give them time to plan any changes on their side. • We conduct extensive testing of any new release or enhancement in our internal testing environment. • The release is then implemented in the UAT environment for client testing. • Our Client Services team is available to help clients with any testing query. The team may also contact clients proactively to discuss the impact and testing of new releases. |
| Enhancement proposals | <p>Clients with recommendations for improvements are asked to contact their Relationship Manager or the Client Services team.</p> |
