Trade Repository Value Proposition

Providing **leading Pan-European** reporting solutions, simplifying the reporting process and helping to drive data quality, across asset classes and geographies

Risk free no cost movement to us

The ISO standards and portability rules ensure effortless cost-free, centrally managed transitions between TRs. SIX enhances this with its MED platform, simplifying onboarding and data management

Client Centric Approach

SIX prioritizes your reporting needs with dedicated Relationship Managers and an experienced regulatory technical support team. We're there for you, when you need us

Trusted Expertise

We leverage our vast experience and deep understanding of regulatory requirements to provide unparalleled support and guidance through your reporting obligations

Advanced Technology

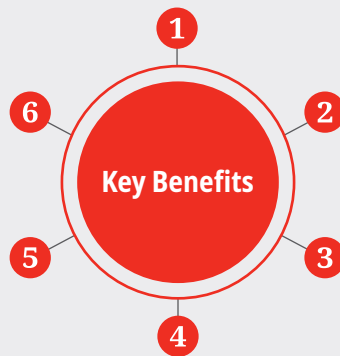

We have advanced technology to support your reporting through personalised, fully customisable files and downloadable reports. An interactive dashboard helps you to monitor your reporting activity

Ease of data submission

Our systems help to streamline submissions, with multiple connectivity channels and validations to ensure regulatory compliance, supported by tools such as our CSV to XML converter

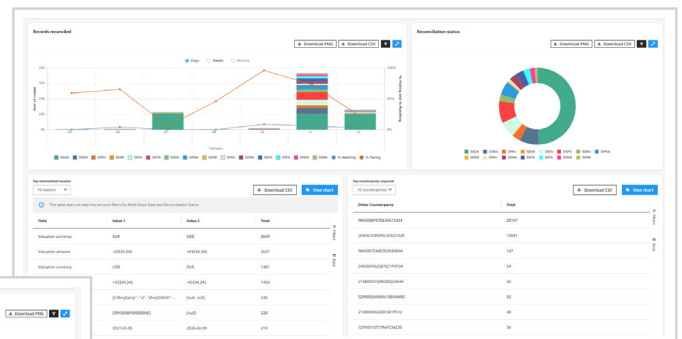

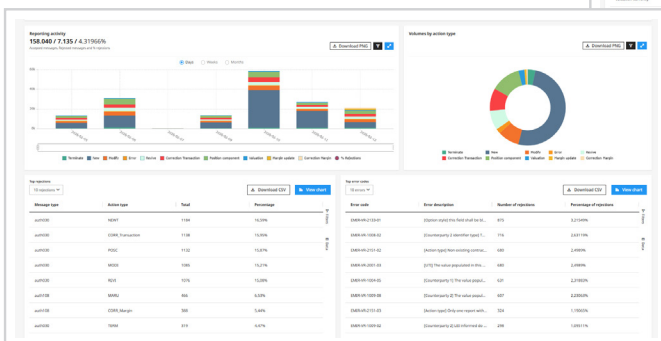

Reconciliation and Compliance

With an increased focus on data quality, our platform includes an enhanced reconciliation and benchmarking engine; allowing clients to proactively monitor breaks and demonstrate oversight to their respective NCAs

Reporting Dashboard

- Summary of all recent activity
- Fully customizable data fields and search engine
- Interactive dashboard, with drilldown capability
- Realtime uploaded file status'
- Reconciliations and benchmarking engine
